“County Vaccine Hub Demobilizing”

Ellis County, TX – The Ellis County Vaccine Hub is scheduled to demobilize on June 4th, 2021. After the Hub closes, individuals desiring a COVID-19 vaccine will have to receive one through Baylor Scott & White or other private healthcare providers. The last call for scheduling vaccine appointments through the Hub is the week of May 10th-14th.

Following a period of significantly decreased demand for COVID-19 vaccines, Ellis County Emergency Management has begun to demobilize its Vaccine Hub at the Waxahachie Senior Activity Center. The Hub will administer 1st doses through Friday, May 14th but only 2nd doses starting Wednesday, May 19th until final demobilization.

After demobilization, Baylor Scott & White will assume control of the county’s surplus Pfizer vaccines. Patients will still be able to schedule appointments for both 1st and 2nd vaccine doses through Baylor Scott & White by following the instructions at <https://www.bswhealth.com/covid-vaccine>. Texas DSHS will also distribute more vaccines to other healthcare providers such as Ennis Regional Medical Center, Methodist Family Health Center at Midlothian, Methodist Family Health Center at Waxahachie, U.S. Drug Mart, Red Oak Drug, and Walgreens.

Since the Ellis County Vaccine Initiative began on February 2nd, 73,143 vaccines have been administered by the Vaccine Hub. Through other mobilized efforts, up to 104,000 Ellis County vaccines have been administered – including full vaccination for 66.41% of the population aged 65+.

“As County Judge, my primary job is to keep our community safe,” reflected Judge Todd Little. “Through the valiant efforts of many, we have successfully completed this public-private partnership. From healthcare providers to local governments, and volunteers to first responders, we accomplished this monumental task with remarkable efficiency and will forever be grateful to every person who participated. This Vaccine Initiative has protected the most vulnerable, preserved our healthcare system & resources, and given our citizens the confidence of knowing that in times of need, our community can and will overcome.”
